

# Increased Capacity to Build and Maintain AI Radiology Software

<div>Client</div> <div></div>	<div>Industry</div> <div>Healthcare</div>
<div>Service</div> <div>Capacity as a Service</div>	<div>Capabilities</div> <div>Cloud &amp; Infrastructure</div>

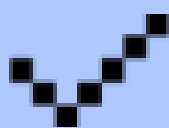

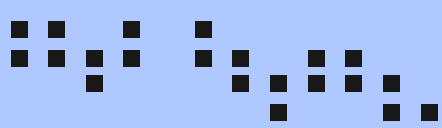

Bayer needed additional capacity to augment their product engineering teams for the Calantific product, a digital suite of AI-based radiology solutions.

**unosquare** brought nearshore software engineering expertise to assist with feature development and maintenance, improving both quality and efficiency. We continue to support Bayer’s team with automation testing and backend development professionals from Latin America and the UK.
